

## W069.10 Natural Bottle Slim 500 ml drinking bottle

Wow! With this beautiful, slim, reusable water bottle you contribute to counteracting the greenhouse effect. The bottle is made from recycled sugar cane (bottle) and bamboo (cap). Both plants extract CO2 from the air during their growth. The bottle is a good alternative to the plastic bottle. By choosing this model you help to reduce the pollution of our environment. You will not smell or taste plastic when you drink from this bottle. Capacity 500 ml. Made in Europe. Each item is supplied in an individual brown cardboard box.
